

UI Design Professional Training

MNC-Level Programme | 2 Months

Transform your career with comprehensive UI design training that prepares you for multinational corporation roles. Master industry-standard tools, build professional portfolios, and gain the skills top employers demand.

Programme at a Glance

8 Weeks Intensive

60 hours of focused training

4 days per week, 2 hours daily

Professional Tools

Figma, FigJam mastery

Behance & Dribbble portfolios

Career-Focused

Real-world projects

MNC interview preparation

Certification

Professional credential

Portfolio evaluation included

Led by Ajinkya Kulthe — Industry expert with extensive experience in creating design systems and training professionals for leading technology companies.

Building Your Design Foundation

Weeks 1–2

Design Thinking & Figma Fundamentals

Establish a robust design mindset whilst mastering the industry's leading design tool. You'll learn visual principles, typography systems, and auto-layout techniques that form the backbone of professional UI design.

01

Design Thinking Process

Human-centred approach, visual hierarchy, colour theory, and accessibility principles

02

Figma Deep Dive

Interface mastery, auto-layout basics, components & variants, constraints & resizing

03

Practical Application

Create login screens, onboarding flows, and responsive navigation headers

Mastering Responsive Design

Desktop First

12-column grids and complex layouts for large screens

Tablet Adaptation

Fluid design with breakpoints and frame constraints

Mobile Optimised

4-column grids and mobile-first strategy

Week 3: Responsive & Adaptive Systems

Learn the critical differences between responsive and adaptive design whilst mastering layout grids, frame constraints, and device scaling. You'll convert desktop designs to mobile layouts and conduct comprehensive case studies on responsive redesigns.

Design Systems That Scale

Week 4 Focus

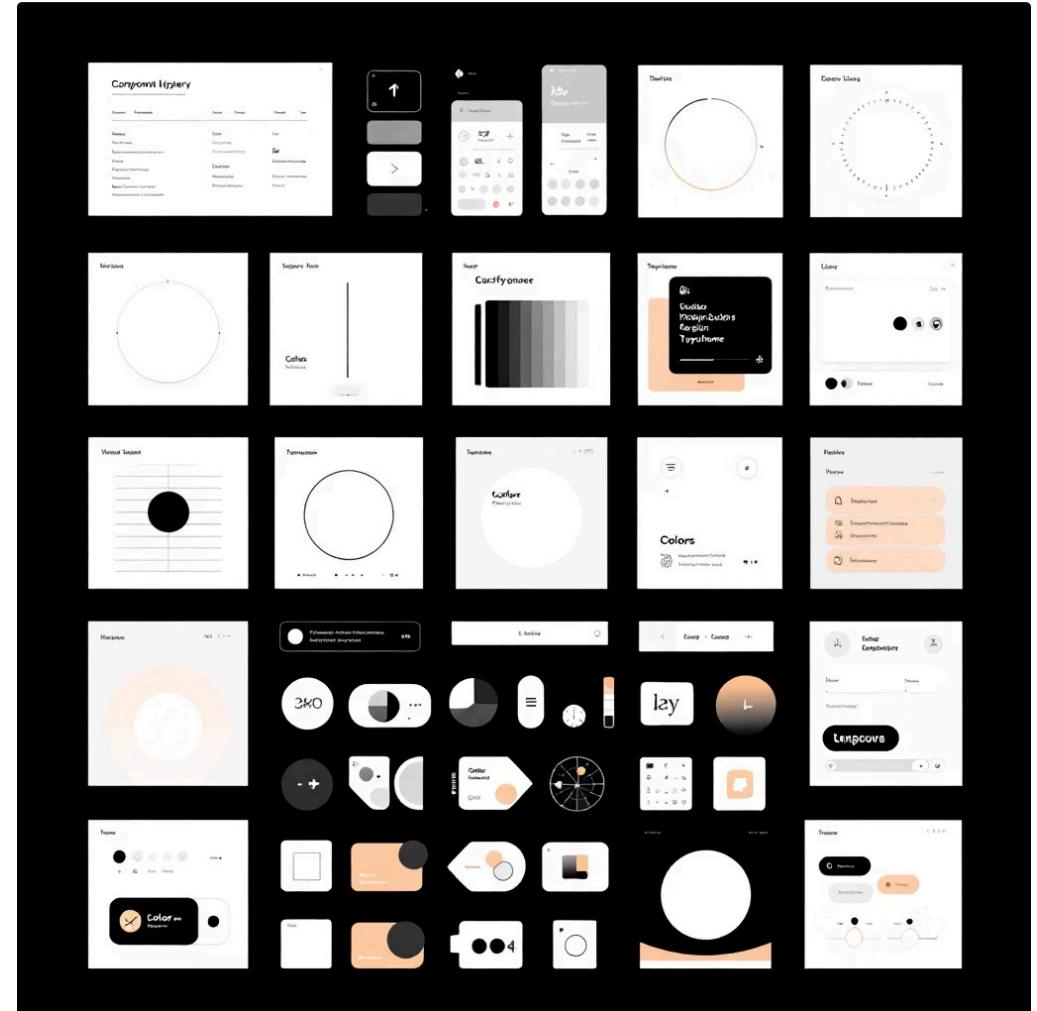

Create professional, reusable design foundations using atomic design methodology. Master design tokens, component libraries, and documentation standards that enterprise teams rely upon.

Design Tokens

Colour palettes, typography scales, spacing systems, elevation shadows

Atomic Design

From atoms to templates — building scalable component hierarchies

Mini Project: Build a complete design system with UI kit documentation that can be applied across multiple screens and shared with development teams.

Advanced Techniques & Interaction

1

Week 5

Advanced Auto Layout

Nested layouts, dynamic grids, adaptive cards, Figma variables

2

Week 6

Interaction Design

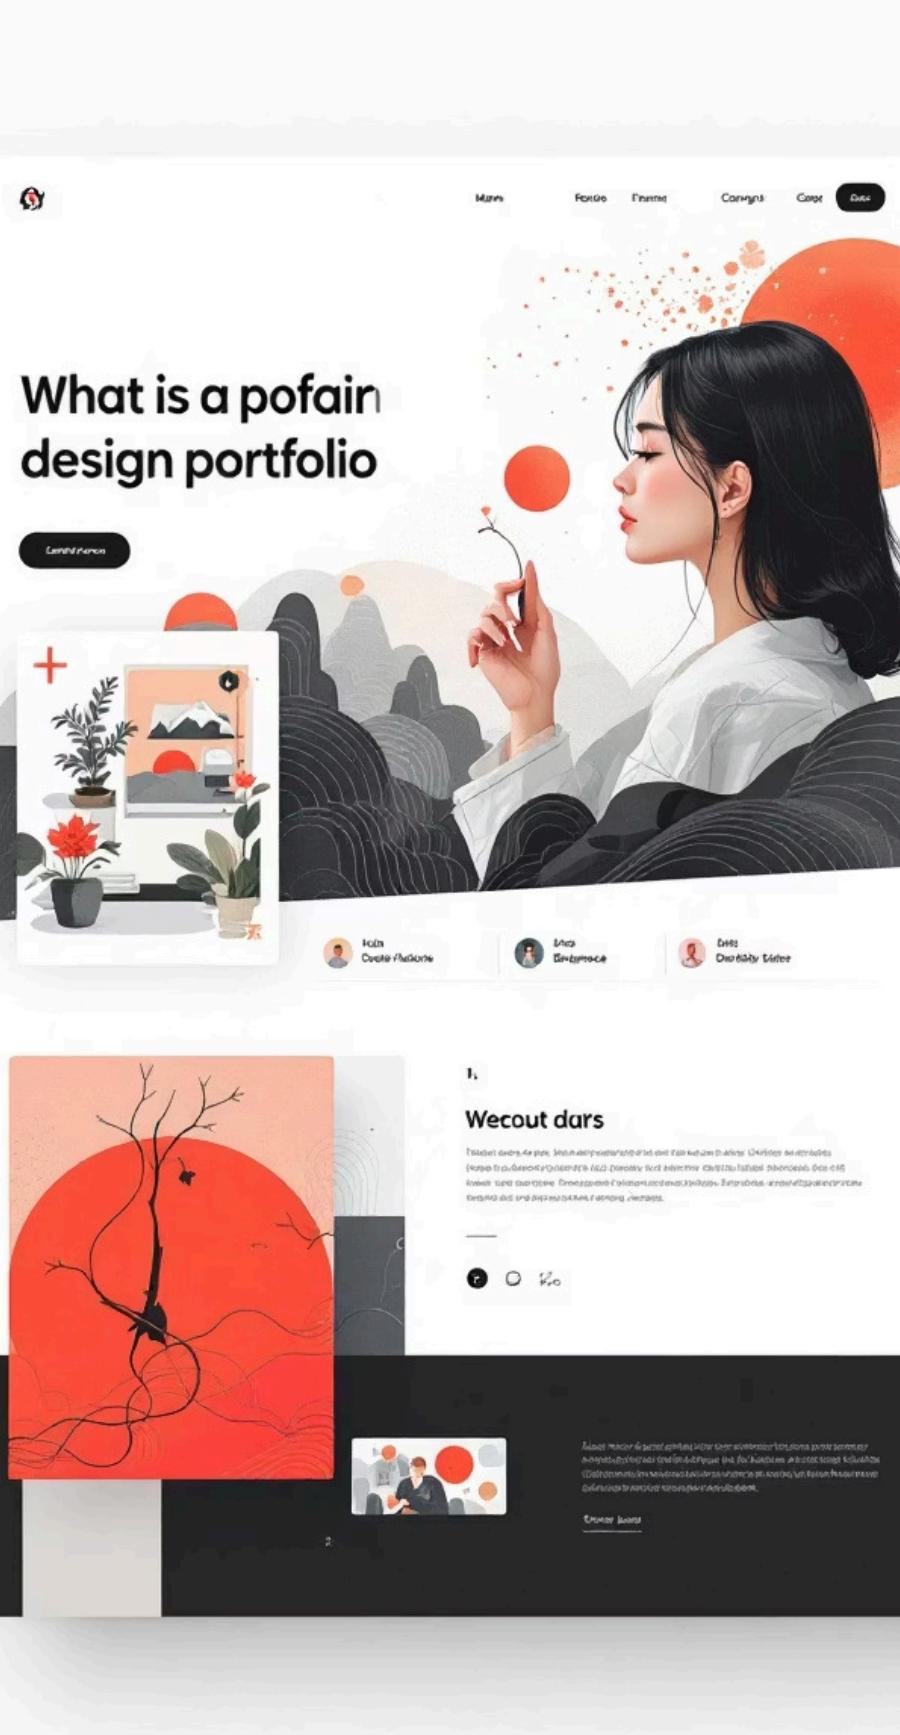

Prototyping flows, Smart Animate, micro-interactions, FigJam flows

Enterprise-Level Components

Build sophisticated, responsive components with property controls and advanced variants. Create product card grids and adaptive systems that work seamlessly across platforms.

Bringing Designs to Life

Add motion and interactivity through prototyping. Master frame linking, create engaging onboarding flows, and develop user journey maps in FigJam.

Your Professional Portfolio

Week 7: Case Studies & Portfolio Building

Learn to present your work like an industry professional. Craft compelling case studies that showcase your problem-solving process, create stunning portfolio presentations, and establish your personal brand across Behance and Dribbble.

Case Study Structure

1

Problem identification, research & discovery, design process, final solution & impact

Visual Storytelling

2

Presentation techniques, mockup creation, documentation standards

Platform Presence

3

Behance projects, Dribbble shots, personal branding strategy

Capstone Project & Career Launch

Week 8

Your Final Challenge

Design a complete mobile or web application featuring 3–5 screens. This comprehensive project demonstrates everything you've learnt and becomes the centrepiece of your professional portfolio.

Project Development

End-to-end app design applying all learnt principles

Peer Review

Collaborative feedback session with cohort

Final Presentation

Behance showcase and professional evaluation

Career Readiness

LinkedIn optimisation and interview preparation

Tools & Career Opportunities

Master These Tools

Figma

Core UI design, auto-layout, components, design systems

FigJam

Brainstorming, user flow mapping, collaboration

Behance

Case study presentation and portfolio showcase

Dribbble

Creative presentation and professional networking

Launch Your Career

UI Designer

Create intuitive interfaces for digital products at leading technology companies

Associate Product Designer

Collaborate with product teams on user-centred design solutions

Design System Specialist

Build and maintain scalable design systems for enterprise organisations

Freelance Designer

Build your portfolio-based practice serving diverse clients globally

Begin Your Journey

Ready to Transform Your Career?

Join the UI Design Professional Training programme and gain the skills, portfolio, and confidence needed to succeed in MNC-level design roles. Led by industry expert Ajinkya Kulthe at Trivikra Tech, this comprehensive course combines hands-on projects, professional tools mastery, and career preparation.

Your certification includes: Capstone project evaluation, digital certificate, portfolio review with detailed feedback, and ongoing career support.
